Introduction

The Student Information Management System (SIMS) is a student-level data collection system that allows DESE to collect and analyze accurate and comprehensive information, to meet federal and state reporting requirements, and to inform policy and programmatic decisions. SIMS has two important components:

- A unique student identifier for all students receiving a publicly funded education in Massachusetts, and
- Transmissions of data from districts to DESE for all students via the security portal.

The handbook provides a detailed description of all 60 data elements that are currently required for each student record. Following the list of the data elements there are appendices to assist in submitting an acceptable and correct code for each data element.

The following information is provided for each data element:

- | | |
|---------------------|---|
| • Name | Name of the data element |
| • Definition | A brief definition of the element |
| • Data Type | Alphanumeric or Integer |
| • Maximum Length | The maximum number of characters allowed |
| • Minimum Length | The minimum number of characters allowed |
| • Acceptable Values | A list of the values that can be submitted. |
| • Notes | Any additional information pertaining to the element |
| • Dependency | Any relationships that exist between this data element and other elements |

DOE001 Locally Assigned Student Identifier

A code assigned and maintained by the local school district that is unique for each student in the district over time.

Type: Alphanumeric

Length: Minimum 1 Maximum 32

Acceptable Values/Code Description:

Student's locally assigned identifier

Notes:

1. The Locally Assigned Student Identifier (LASID) will be used as directory information in the State Student Registration System to verify and assign State Student Identifiers.
2. The Locally Assigned Student Identifier must be created and maintained by the district to provide a unique identifier for students within the district over time and be submitted with all individual data submitted to the Department of Elementary and Secondary Education.

Dependencies:

SIF Information

Object: StudentPersonal

Element: LocalId

Values: Alphanumeric

DOE002 State Assigned Student Identifier (SASID)

A unique number assigned to an individual by the Massachusetts Department of Elementary and Secondary Education.

Type: Alphanumeric

Length: Minimum 10 Maximum 10

Acceptable Values/Code Description:

10-digit state-assigned identification number

Notes:

- In order to track students within and across districts over time and to keep student information secure and confidential at both the state and local levels, two student identifiers will be used — one assigned by the district in which the student is enrolled (LASID) and a State Assigned number (SASID).
- State Assigned Student Identifiers will be assigned through the State Student Registration System. Districts will need to use the State Assigned Student Identifier and the Locally Assigned Student Identifier on all individual data submitted to the Department of Elementary and Secondary Education.

Dependencies:

For the purposes of determining eligibility for immigrant funds, "State" is defined as the 50 States, the District of Columbia, and the Commonwealth of Puerto Rico.
Country of Origin must be provided.
2. Country code equals 500 if:
 - a. Student was born in the United States
